Chief Technology / Information Officer (CTO / CIO)

Chief Technology / Information Officer

Our client is an established online retailer with a growing international presence.

Exceptional growth in the past few years has created an opportunity for a CTO/CIO to join the company based on St Kilda Road.

About The Role

As **CTO / CIO,** you will be lead the IT function of the business and will be responsible for developing and implementing IT strategies to improve efficiencies and enhance processes throughout the business.

Key to this role is the maintenance and the development of online systems inline with eCommerce fulfilment.

This is a diverse and autonomous role which will cover all aspects of IT across different business functions.

Skills and Experience

Prior experience in a Senior IT Leadership position, within a retail business with international exposure is an essential requirement.

From this you would also have the following skills and expereince.

- Highly technologically adept
- In-depth understanding of IT processes and systems in a retail environment from POS to Online and eCommerce Systems
- Experience with various ERP systems
- Excellent communication and leadership skills
- Proven Track Record of carrying out large scale improvement projects

We have received a very high volume of applications and enquires about this role.

If your skills and experience align with what we are seeking, please apply now via seek and we will be in touch.
